A. Conv channels and projection size
Conv channels
Projection size
AF3 F7 F3 FC5 T7 P7 O1 O2 P8 T8 FC6 F4 F8 AF4
B. Convolution versus recurrent capacity
RNN capacity = Hidden size^2 × GRU layers
Conv. capacity = (k1 × Channels) + (Channels × k2)
Effective RF
9
16
24
C. Kernel sizes and stride pattern
Kernel size
Kernel 1
Kernel 2
Channel
D. PCA of channel hyperparameter profiles
PC1 (26.4% var)
PC2 (20.4% var)
