
A
A. TRAINING DATA (public pool + in-house fit)
n = 559
r = +0.949
MAE = 3.59
chance MAE = 12.71
bias slope = -0.183
IN-SAMPLE - not a result
public train (n=539)
in-house FIT (n=20)
identity
fit (slope 0.82)
median-age guess
+72% vs chance
predicted age (years)
chronological age (years)

B
B. PUBLIC VALIDATION, pooled
n = 179
r = +0.754
MAE = 8.09
chance MAE = 12.88
bias slope = -0.490
public validation (n=179)
identity
fit (slope 0.51)
median-age guess
+37% vs chance
predicted age (years)
chronological age (years)

C
C. PUBLIC VALIDATION, split by cohort
ds003775 n= 25 r=+0.747 MAE=7.44 chance=11.92 +38%
ds005385 n=154 r=+0.747 MAE=8.20 chance=12.71 +36%
ds003775 (n=25)
ds005385 (n=154)
identity
predicted age (years)
chronological age (years)

D
D. IN-HOUSE HOLD-OUT (41, locked)
n = 41
r = +0.537
MAE = 7.44
chance MAE = 9.10
bias slope = -0.701
in-house hold-out (n=41)
identity
fit (slope 0.30)
median-age guess
+18% vs chance
predicted age (years)
chronological age (years)
