A. Frozen vs fine-tuned encoders
Best validation loss (SmoothL1)
Frozen encoders
Fine-tuned encoders
B. Common dim vs validation loss
group mean
Common dim (attention embed size)
C. Linear layer size vs validation loss
FC1
FC2
group mean
Layer size (FC1 = circle, FC2 = square)
D. Attention heads vs validation loss
Number of attention heads
E. Training loss per run
Train/Loss (SmoothL1)
Epoch
F. Validation loss per run
Val/Loss (SmoothL1)
